### Evropské fórum politik architektury European Forum for Architectural Policies

Praha 16.-19. dubna 2009 / Prague 16-19 April 2009

## The Policy On Architecture Of The Czech Republic /

#### THE GOVERNMENT OF THE CZECH REPUBLIC,

whose objective is to improve the quality of living conditions for its citizens, particularly regarding the provisions of

- Article 7 of the Constitution of the Czech Republic,
- Article 35 of the Charter of Fundamental Rights and Basic Freedoms,
- Act no. 183/2006 Coll. on Land-Use Planning and Building Code (Building Act),
- Act no. 360/1992 Coll. on the Professional Practice of Certified Architects and on the Professional Practice of Certified Engineers and Technicians Active in Construction, as amended,
- Act no. 17/1992 Coll., on the Environment, as amended,
- Act no. 114/1992 Coll., on the Protection of Nature and Landscape, as amended,
- Act no. 20/1987 Coll., on National Heritage Care, as amended,

while taking into account the provisions of the Directive 2005/36/EC of the European Parliament and of the Council on the Recognition of Professional Qualifications, and on the basis of the EU Council Resolution 2001/C 73/04 on architectural quality in urban and rural environments and on the basis of the EU Council Conclusions 2008/C 319/05 on architecture: culture's contribution to sustainable development,

and taking into account other international Treaties adopted by the Czech Republic which thereby committed to fulfil obligations under these Covenants,

#### **CONSCIOUS OF THE FACT THAT**

the space of the Czech Republic is co-created by architecture, landscape and segments of nature in urban and rural environment;

the urban environment of towns and countryside quality is determined especially by the quality of its architecture including urban planning;

the architecture quality including urban planning and landscape management is the basic and immediately perceived indicator of cultural and civilisation advancement of our country;

the architecture quality influences significantly and continuously attitudes and behaviour of every citizen as well as of the whole society in all fields of human activity, particularly in the social and economic ones;

the architecture quality implicates fundamentally the way how the world community perceives our state and thereby directly determines conditions of economic and social assertion in the globalised world;

quality architecture is a significant tool for provision of sustainable, economical and harmonic development of settlement friendly to

the environmental quality and influencing the landscape and nature conditions;

quality architecture manifests creative potential of citizens and creates a unique ethic and aesthetic legacy from the present generation to future generations;

architectural creation is concurrently intellectual, economic, cultural, artistic and professional activity which concerns all social fields;

systematic architectural creation is a professional service to the society having particularly economic and cultural nature;

well set-up conditions for architectural creation have positive influence on aesthetic and economic quality of development and, subsequently, on the whole economy;

architectural competitions are highly transparent, quality emphasizing and also economical way of public architectural or urban planning procurements;

#### COMMITS
